

Oregon Society of Clinical Hypnosis

Welcomes you to another great year

56th Annual Intermediate Course in Clinical Hypnosis Portland, OR - April 5-7, 2019 - 20 CEs

- American Society of Clinical Hypnosis regional conference in Bellevue, WA, May 2-5, 2019

www.asch.net - in addition to the **advanced pain management** course (basic course prerequisite), basic and intermediate courses will be available

This course spans 3 days, providing 20 CE hours, including pending ethics credit. Course content is consistent with the American Society of Clinical Hypnosis basic & intermediate training guidelines. The course is a mix of didactic presentations, demonstrations, experiential exercises, and opportunity to practice in safe, supervised faculty led small groups. Small group mentored practice is tailored to the learning needs and style of each participant. At the end of the course participants will have been taught the basic skills needed to utilize clinical hypnosis and begin using it in a practice setting.

An Evidence Based Clinical Intervention

- Integrates with numerous treatment modalities and treatment approaches
- Increase symptom resolution when incorporated with other treatments
- Effective In the treatment with depression, anxiety, PTSD and other disorders
- Effectiveness with both acute and chronic pain management
- Treat stress disorders, dental anxiety and bruxism
- When used with surgery, can reduce recovery time and medication needs
